

Data Warehouses and Data Mining Systems

Laboratory 1: Report content

1 Topic

Describe what is the purpose of your research – e.g. “Fish market in West Africa”

2 Datasets

Provide links do datasets.

Describe the content of the datasets and – e.g. “Two files, one containing ..., while the other ...”.

Write a short description of the most important columns – e.g. “Columns: timestamp – transaction time, location – city, price – unit price, ...”.

3 Analysis

Describe what knowledge you want to extract from your datasets – e.g. “Average sales per quarter and province”.
